

# Quick Guide: Setup for Animating

---

## Mobile and Tablet settings for Stop Motion Studio app.

(Setup Video timecode: Phone setup 0:22, Tablet setup 3:10, Equipment setup 5:40)

- Select New Movie
-  - Select Cog icon for Project Settings
-  - Select dial icon: set **Frame Rate** at 12 frames per second
-  - Select Camera icon to go to the Capture screen
-  - Select Slider icon for Capture settings
-  - Select M icon for the Mode menu
-  - Select the new M that appears again, to set the camera to **Manual**
-  - **Focus** on subject
-  - Set **Onion Skin** slider where you want it (halfway is good)
-  - Shoot some animation! (Big Red Button)
-  - Recording sound, on phones select the back arrow to take you to the Timeline screen
-  - Find the frame you want sound to start on, and select the Microphone
-  - To delete a single frame, tap on the frame in the Timeline to open a new menu, select the Delete icon
-  - To Export, go back to the first New Project screen and hold down on your project to highlight it, then tap the share icon at the top left.
- 

---

## Equipment setup

- Choose a steady surface
- Stabilise the camera (Tripod and clamp / Duct tape it to the surface / Heavy object holding it in place / lump of plasticine as a base etc.)
- Block direct natural light to avoid flicker
- Light your subject evenly using overhead light, or table lamps - try bouncing the light off another surface to avoid hot spots.
